

Canadian Hospital Reporting Project: Draft Indicators List

Clinical Indicators List	
Indicators: Effectiveness (Quality and Outcomes)	
5 day mortality following major surgery	
30-day in-hospital mortality following AMI	
30-day in-hospital mortality following stroke	
28-day Readmission after AMI	
28-day Readmission after Stroke	
28-day Readmission after Asthma	
28-day Readmission after Hysterectomy	
28-day Readmission after Prostatectomy	
90-day Readmission after Hip replacement	
90-day Readmission after Knee replacement	
Indicators: Patient Safety	
Nursing-Sensitive Adverse Event for Medical conditions (all Medical CMGs)	
Nursing-Sensitive Adverse Event for Surgical conditions (all Surgical CMGs)	
Obstetrical Trauma - Vaginal Delivery with Instrument	
Obstetrical Trauma - Vaginal Delivery without Instrument	
Birth Trauma - Injury to Neonate	

In Hospital Hip Fracture for Elderly
Indicators: Appropriateness
Caesarean Section Rate - Uncomplicated Caesarean Rate - Primary Caesarean Rate
Vaginal Birth After Caesarean
Use of angiography following AMI
Indicators: Accessibility
Delay to Hip Fracture Surgery

Financial Indicators List

Financial Health

Total Margin

Current Ratio

Average Age of Equipment

Efficiency/Productivity

Administrative service expense as a percentage of Total expense

Cost per Weighted Case

Service recipient support expense as a percentage of Total expense

Inpatient Nursing Productivity

Hours per weighted case

Human Resources Indicators

Total Benefit Hours as a percentage of Total Earned Hours

Inpatient RN earned hours (worked hours, benefit hours, purchased hours) to total inpatient nursing earned hours
